Something in the Way

It's amazing how much you're a part of me

It's like I feel your heart beating inside of me

I thank God for you, everyday

Your every smile is a guiding light

To the love in behind your eyes

But in a heartbeat all that changed

There's something in the way he looked around at you

Something in the way he smiled at you

Something blew my heart away

There's something in the way his eyes spoke to you

Something tell me there's more to the truth

Something blew my heart

Never in my wildest dreams

Would I have foreseen this

With all the promises we made

My hearts' spilt all over the floor

From zero to can't take anymore

In the time I took a breath.

You turn round and see that I see love, see love

Now I have to leave love, please love

Don't ask me to stay
