I Need You

As I look into your eyes

I see a future love paradise

You're more than I ever dreamed

True love could be

It's time I let the whole world know

I found the one for me

So as we stand here today

Can I just say?

In every way,

I need you

Cause words won't convey

What my heart has to say

Or every way

I need you

So the promise I make here today

Is to love you each step of the way

I'll always be there for you

To help fight back the grey

I'll pick you up and never let you down

I'll always find a way

Together, Forever, from this moment on

Together, Forever, till death do us part
